

Product Bundle

Optimize Your Air Monitoring Service

Odour Monitoring Pro

SM100i
Olfactometer

PTFE Sample Bags

VC20 Vacuum
Chamber Sampler

CTmini Analyzer

► Landfill & Compost

- In-field results from olfactometer helps determine the next measurement location
- In-field result and lab results give a non-bias assessment
- Continuous air monitoring for emission data if complaints are made

Sampler Pro

SF450 Flux Chamber
Sampler

PTFE Sample Bags

VC20 Vacuum
Chamber Sampler

TR8 Odotracker
Analyzer

► Wastewater Treatment Plant

- Capture emission from solid (eg soil) or liquid (eg wastewater/river) surface
- In-field analysis from TR8 helps determine the next measurement location
- In-field result and lab results give a non-bias assessment
- Available to revisit with TR8 for more assessments after lab result

Battery-Powered Analyzer Pro

CTmini Analyzer

Integrated Weather
Station

Replaceable/
Rechargeable
Battery

Solar/Wind
Turbines

► Mining

► Wildfire

- Real-time data on particulate matter 1, 2.5, 4 and 10, temperature, relative humidity and wind speed
- Wind speed data helps determine the direction of air pollutants
- Provide mobility and monitor at locations without power outlet

Drone-Based Analyzer Pro

DR2000 Analyzer

Sample Acquisition

Integrated Weather
Station

Integrated Thermal
Camera

► Emergency Response

- In-field data from DR2000 helps determine the next measurement location
- In-field result and lab results give a non-bias assessment
- Wind speed data helps determine the direction of air pollutants
- Thermal images helps to find where the high-concentration pollutants located
